EMFStore

An EMF Model Repository

Maximilian Kögel, Jonas Helming
Technische Universität München
{helming, koegel}@in.tum.de

What does it do?

Existing Solutions

- File-based SCM and EMF Compare:
  - Available implementations: SVN, CVS, GIT
  - Essentially file-based: frequent conflicts
  - Difficult diff and merge for bigger models
  - Limited support for change aggregates
- CDO
  - No offline-mode
  - No support for merging
  - (Too fast)
- JCR
  - No offline-mode
  - No native EMF support
- OOSE
  - No offline-mode
  - No EMF support

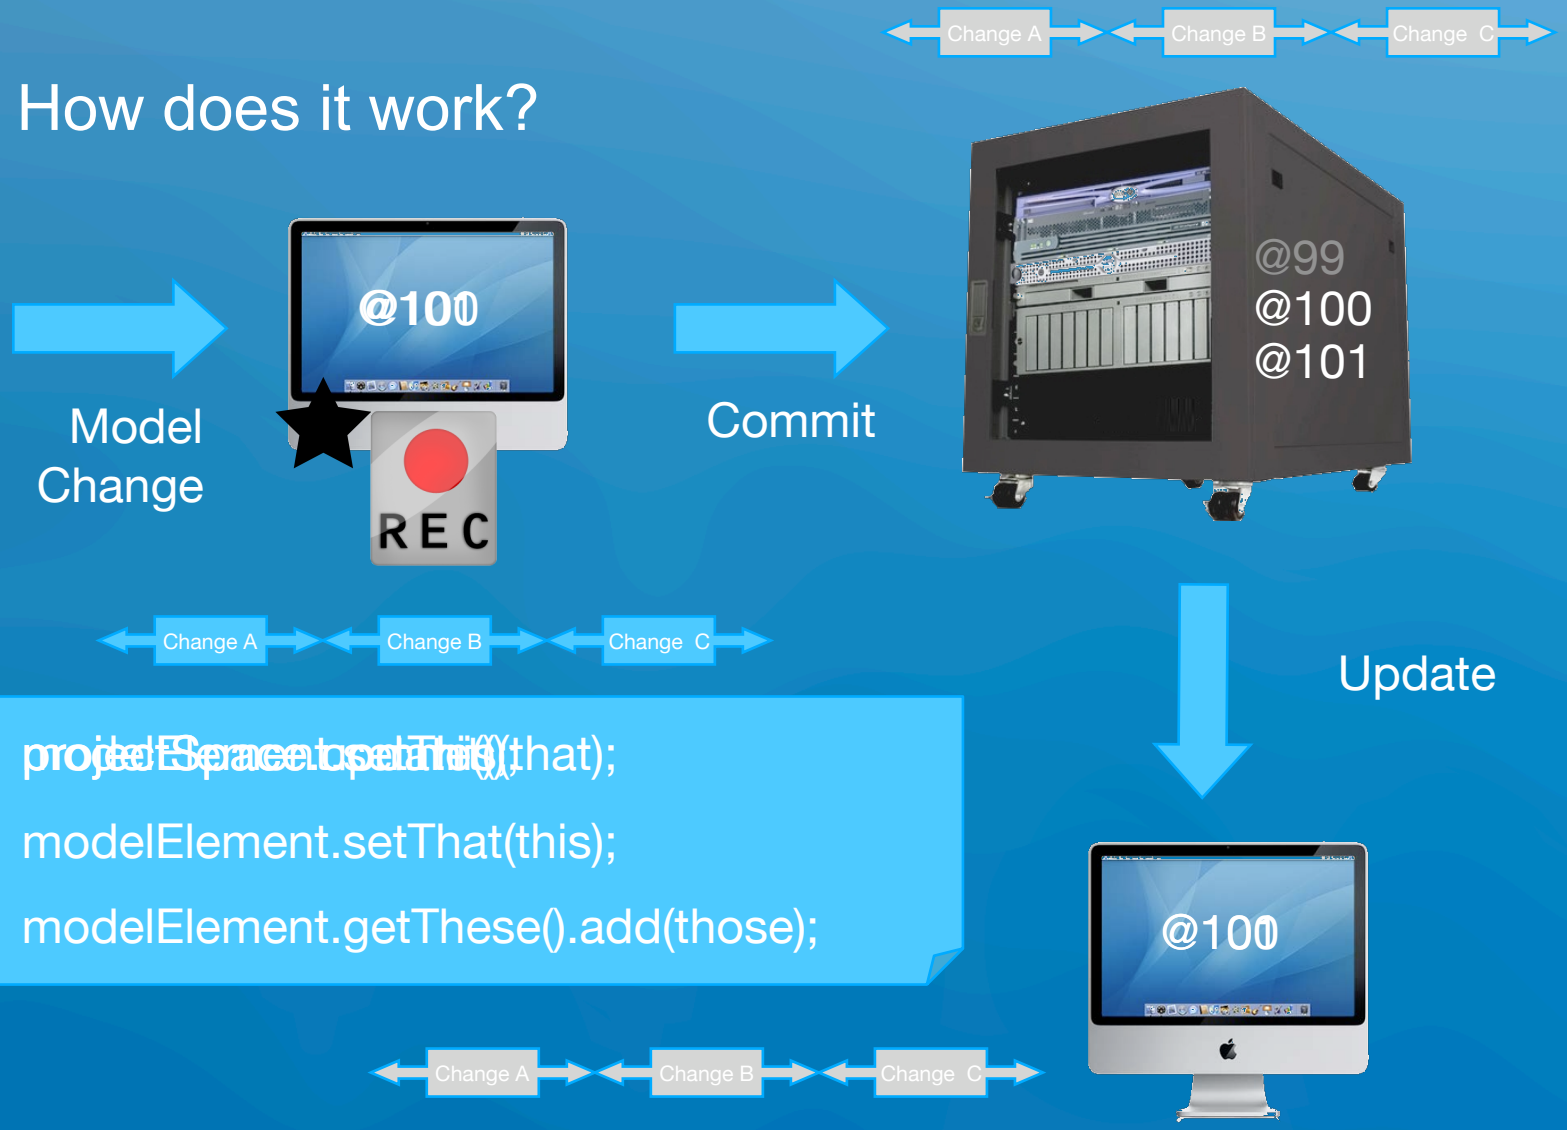

Core Features

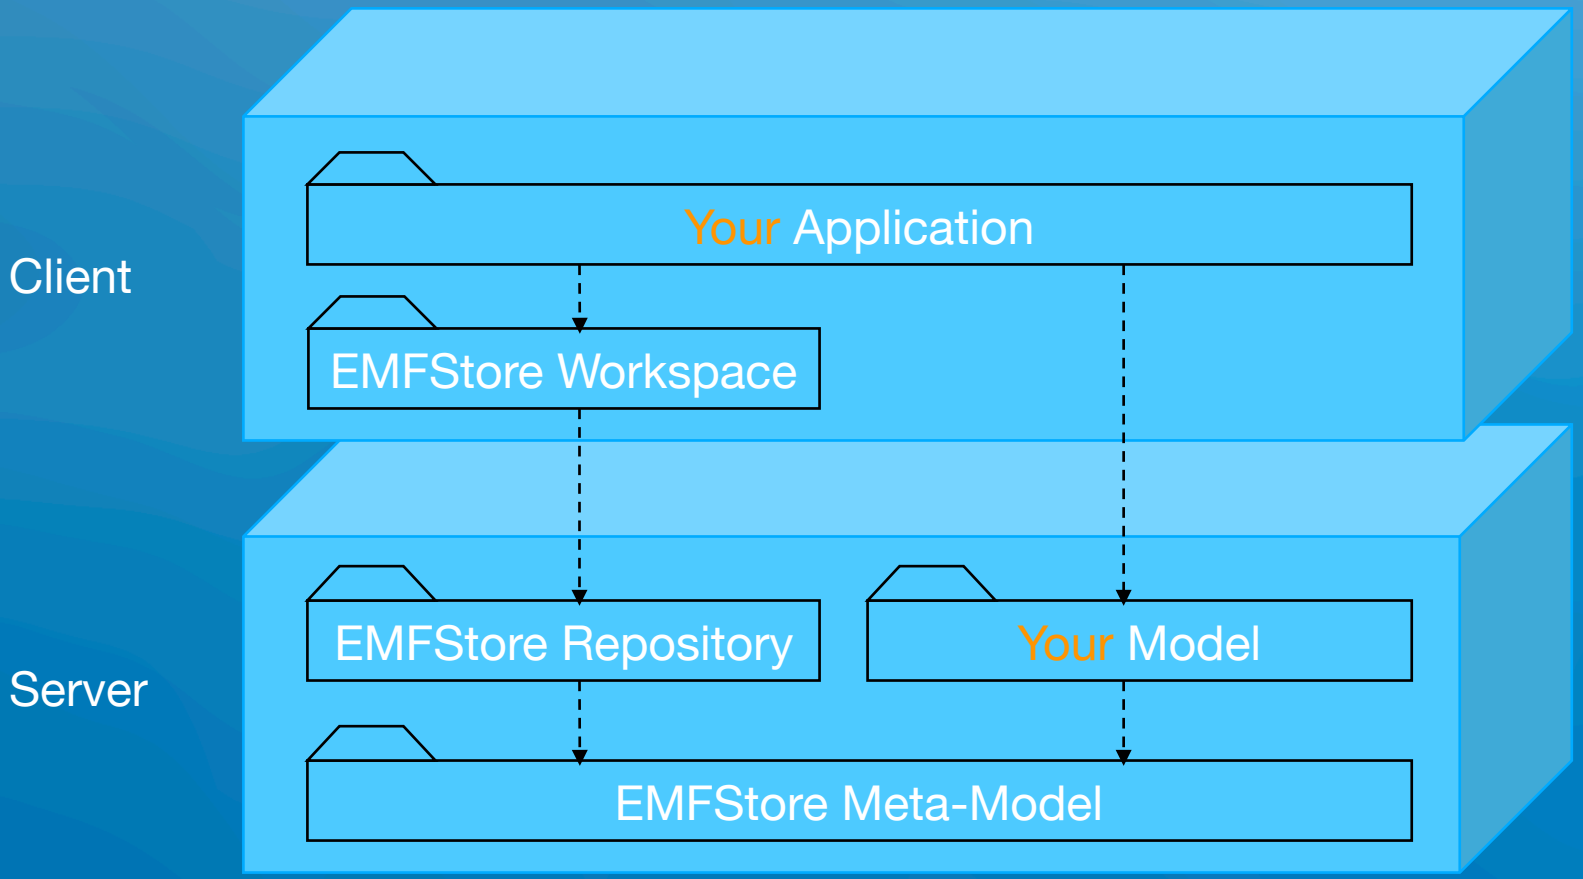

- Model Persistency
- Access Control
- Distributed and Offline Operation
- Versioning
- Diffing and Change Visualization Support
- Fine-grained Conflict Detection
- Support for Change Aggregates

How does it work?

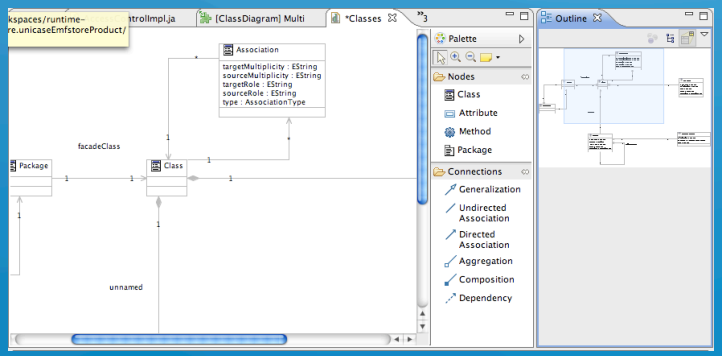

Architecture Overview

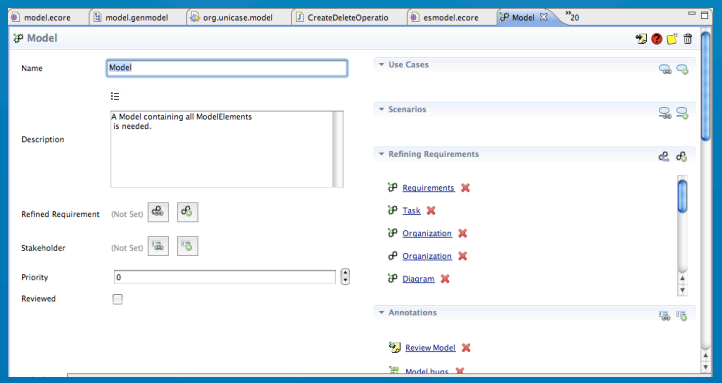

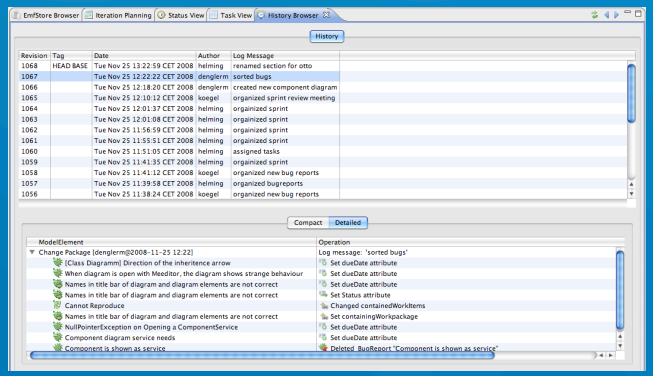

unicase.org

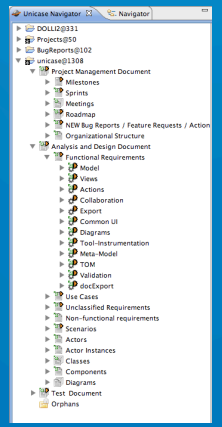

What is our application?

- Unicase, a Unified CASE Tool:
  - Requirements
  - Use Cases
  - UML
  - Tasks, Issues and Bug Reports
  - Easily extensible for other models
- Open-Source

Unicase Project Setup

- Collaboration partners:
  - Academic:
    - TUM
    - LMU
    - University of Heidelberg
  - Industrial:
    - beople
    - msg
    - Airport Munich
    - Siemens Corporate Research
- Development team:
  - 4 (+4) doctoral candidates
  - 8 students

Demo

We would like to contribute and look for...

- Opinions
- Advise
- Users
- Participation
- A mentor

Talk to us, meet us at the poster reception, mail us (unicase.org)
