

Building model-based Applications with the EMF Client Platform

Jonas Helming, Maximilian Koegel
{helming, koegel}@in.tum.de

Chair for Applied Software Engineering
Institut für Informatik
Technische Universität München

Warning

- Only 6 slides until we get started with coding
- Please:
  - Install Eclipse Galileo Modeling Edition
  - Install EMFCP from Update Site
  - Report any problem to the co-instructors

You...

- ... want to build an entity-centric application?
- ... want to use EMF to model your entities?
- ... want to have a running version ASAP?

- ... do not (yet) know how the UI will exactly look like?
- ... do not (yet) know what additional frameworks to use?
- ... do not want to deal with files and adapters?

=> You should use the EMF Client Platform

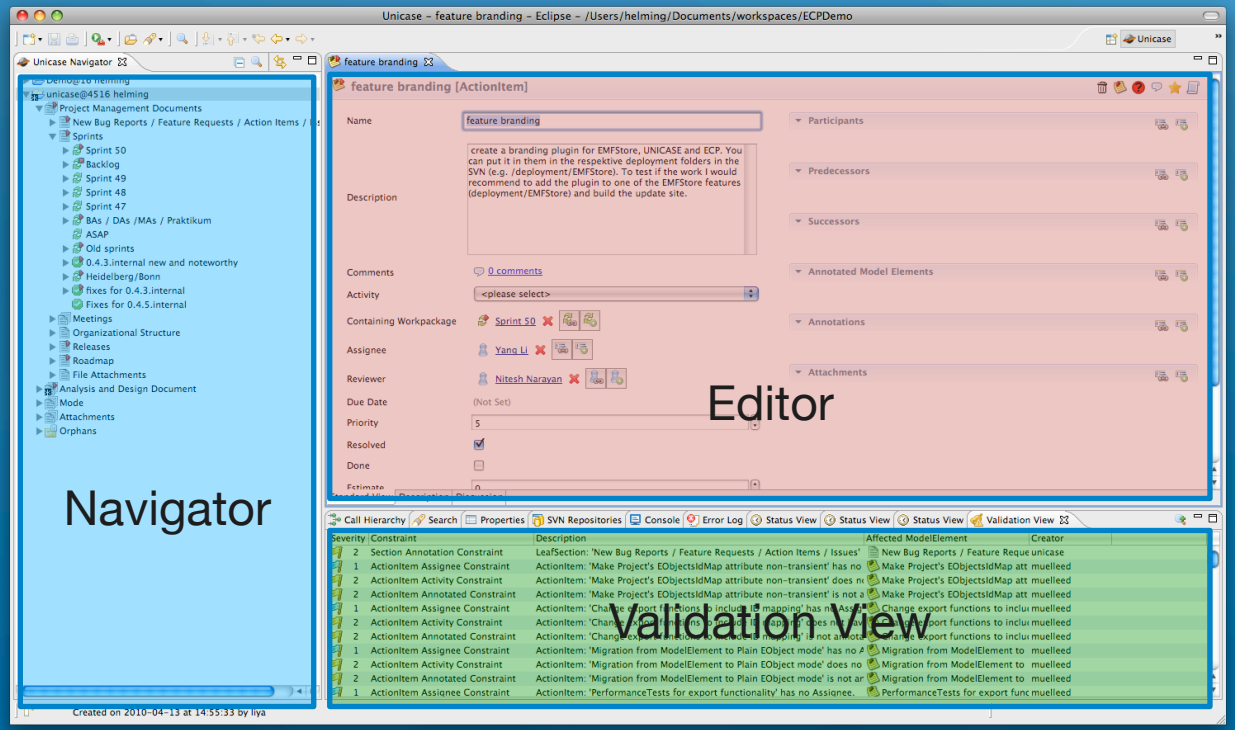

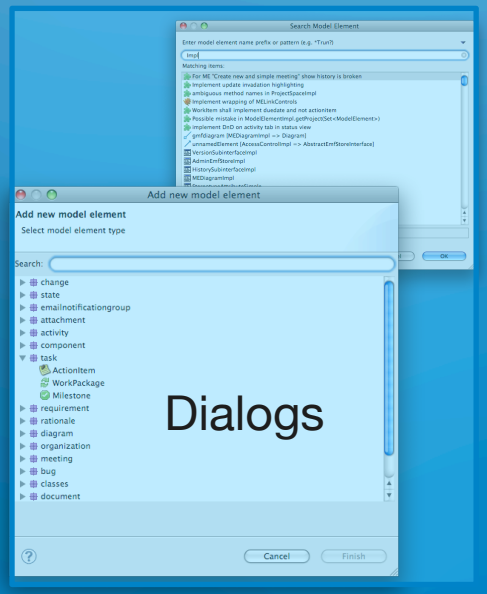

Manifest of the EMF Client Platform

- One-click Application
- Extensible and Replaceable
- EMF-Centric

Features

Model Workspace

Architecture

Your Application

Model | Custom View | Custom Control | Custom Constraint

EMF Client Platform (ECP)

Editor | Navigator | Validation | UI.common | Workspace

Eclipse Frameworks

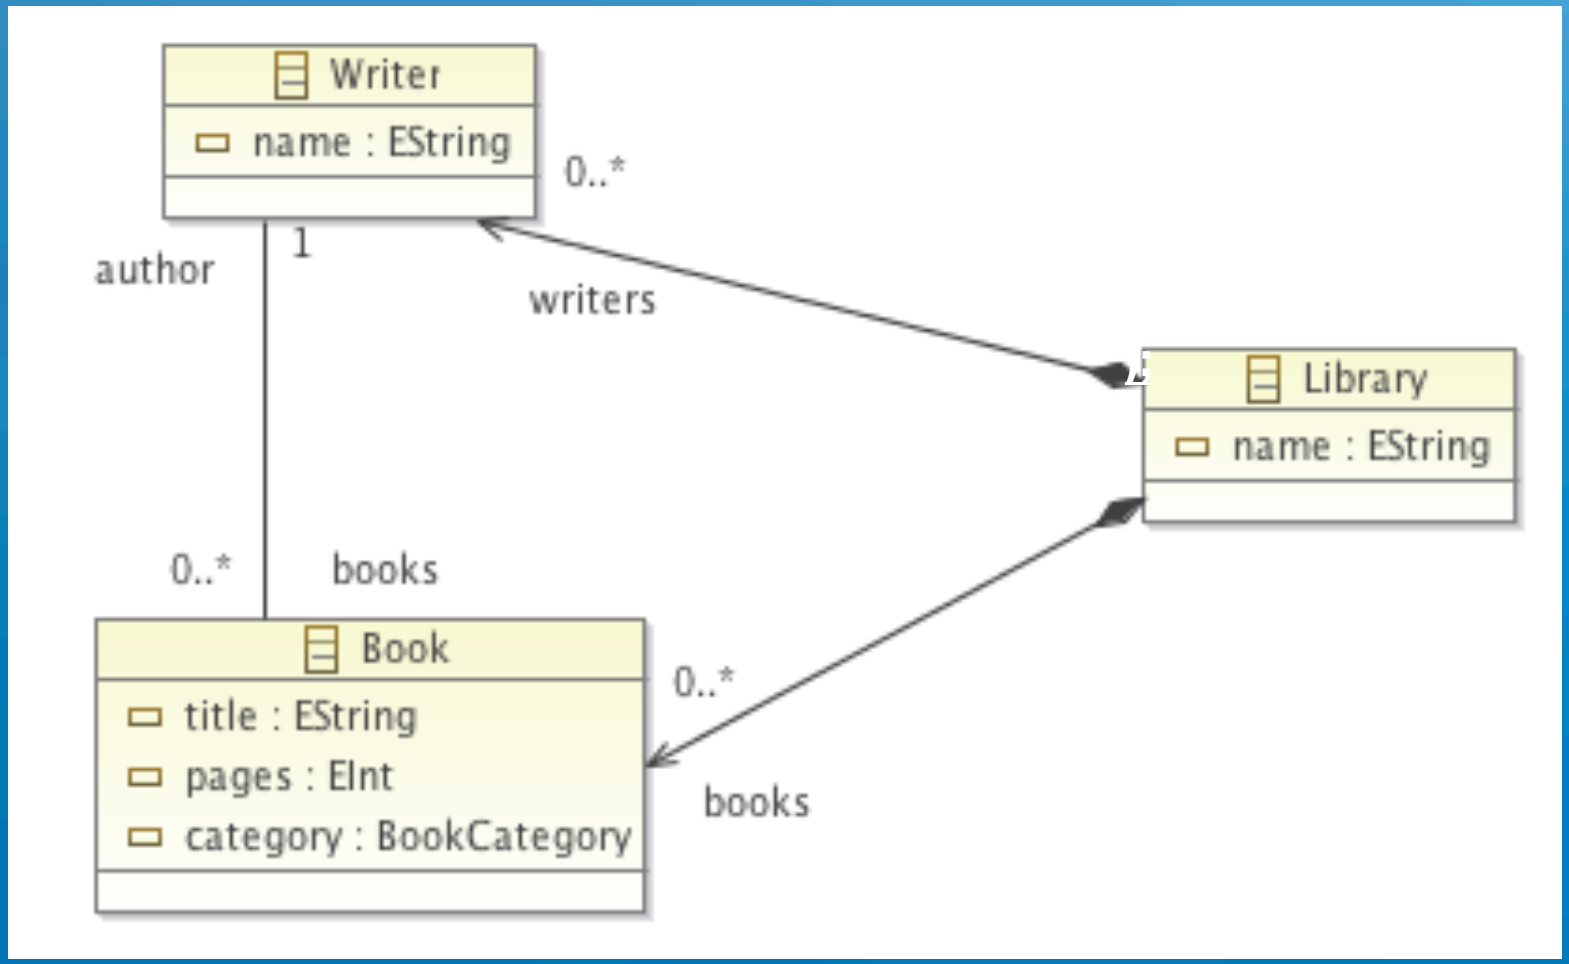

EMF.Edit | EMF Validation | Databinding | ...

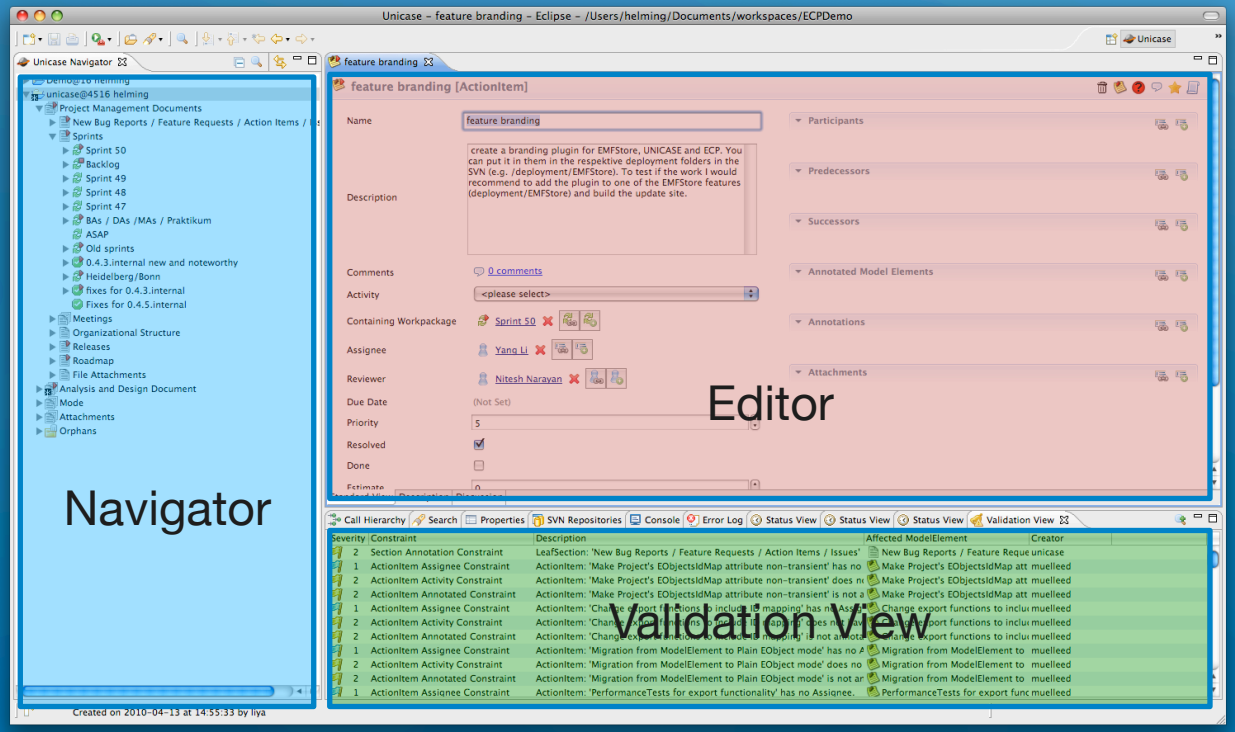

Tutorial

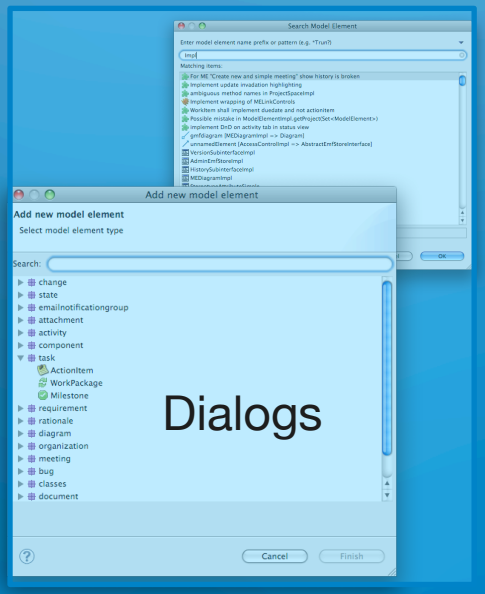

The Library Model Example

Generic UI

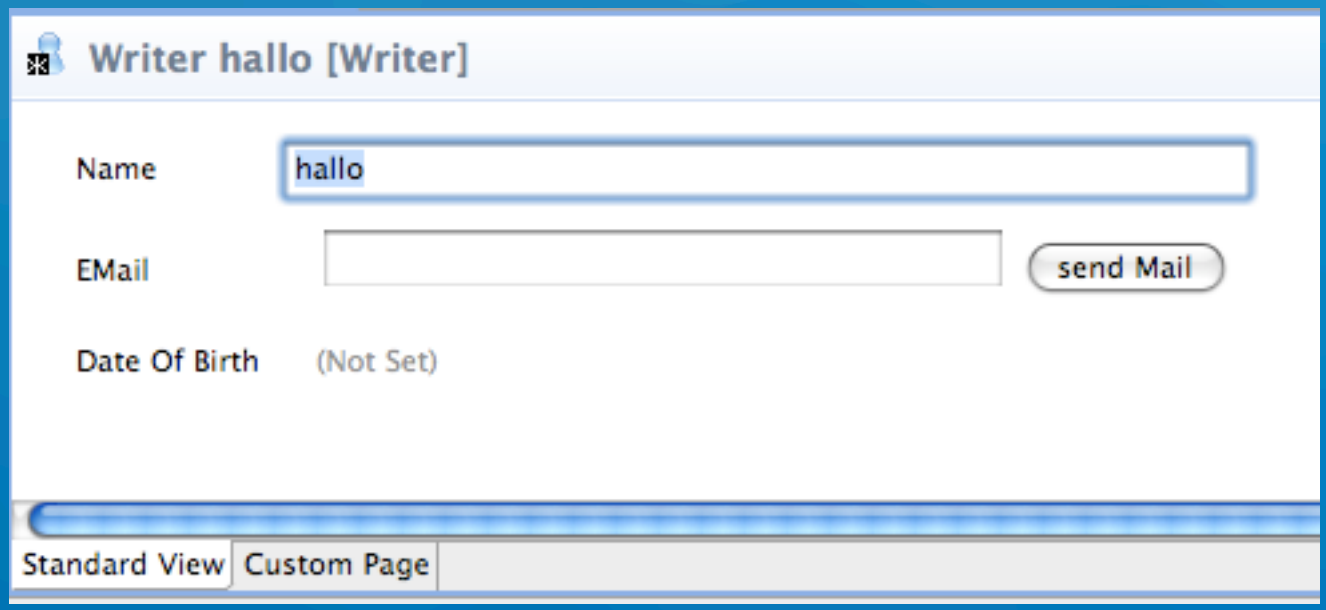

Modify the model

- Add E-Mail to author
- Add Date of Birth to author
- Add LP with Title and digitalized
- Modify Label Provider

Customize the Editor

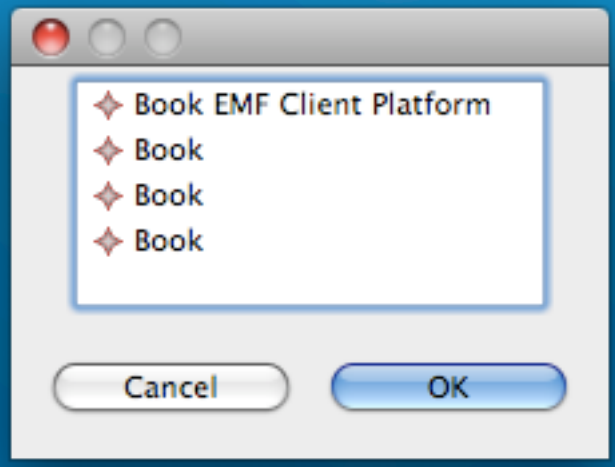

- Add control for E-Mail attribute
- Add new page to editor

Customize the Navigator

- Add custom drop adapter for Book
- Add custom opener for Library

Validation

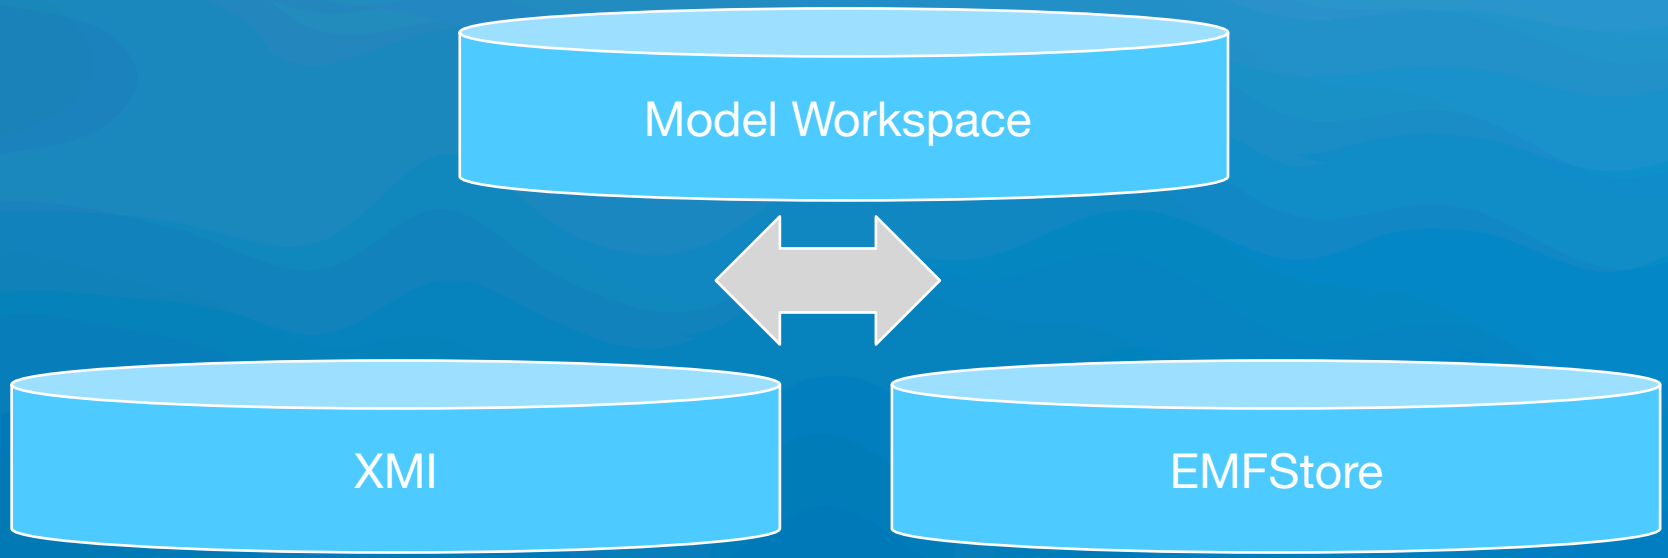

- Show existing Validation rule
- Add new Validation Rule

Validation View

Severity	Constraint	Description	Affected ModelElement	Creator
4	Book Author	This book has no author	Book EMF Client Platform	unknown
4	My constraint	This Book has no title	Book	unknown
4	My constraint	This Book has no title	Book	unknown
4	My constraint	This Book has no title	Book	unknown

Transparent Workspace
